Coastal Zone Boundary Description
Inland Coastal Zone Boundary:
The inland coastal zone in the City and Borough of Yakutat includes all islands and the lands and waters within the following:
(1)The timberline of the coastal Sitka Spruce/Hemlock forest; (2)Slopes contiguous with marine waters where mass wasting is evident or likely to occur; and (3)Unvegetated areas left by receding glaciers where the coastal forest is likely to invade.
An on-site visit or reference to 1:63,360 USGS topographic maps, aerial photography, or vegetation maps may be necessary to determine if the above criteria apply and whether the use or activity will lie within the coastal zone.
Seaward Coastal Zone Boundary:
The seaward coastal zone boundary is the outer limit of the United States territorial sea (15 CFR 923.32), which is the three geographical mile line (43 CFR 3301.1).
Federal Lands:
Excluded from Alaska's coastal zone boundaries are those lands owned, leased, held in trust or whose use is otherwise by law subject solely to the discretion of the Federal Government, its officers or agents (15 CFR 923.33). Activities on these lands are subject to the consistency provisions of Section 307 of the Coastal Zone Management Act of 1972, as amended.
